Specifically re-engineered for increased patient comfort, foam layering now effectively supports patient weight ranging from 50-230kg.

FEATURES AND BENEFITS

Immersive Visco-elastic Memory Foam Surface: Top layer is now twice as thick to offer significant improvement in user comfort

Intelligent Hose Management: When not in use the air-hose can be stored internally, reducing infection control and OH&S risks.

Integrated Shear Reduction: Memory foam layer moves independently of the cell surface reducing shear when bed is adjusted.

Optimised Heel Protection: Tapered heel zone redistributes pressure to lower leg, away from the vulnerable heel region. The castellated surface collapses in a wave-like movement reducing shear.

Innovative pump technology: Reduces noise and vibration for uninterrupted sleep.
